Profile Summary

- **Full Stack Developer** specializing in building scalable, event-driven multi-tenant web applications and RESTful microservices.
- Proficient in implementing high-concurrency architectures using Node.js, Express, Java/Spring Boot, React.js, Redis, and MongoDB ACID transactions.
- Hands-on experience with asynchronous background event queues (BullMQ + Redis), real-time WebSockets (Socket.io), and containerized deployment via Docker.
- Strong problem-solving abilities with a track record of building automated CI/CD pipelines, interactive dashboards, and AI-powered telemetry endpoints.

Relevant Coursework

- | | | | |
|-----------------------------|--------------------------------|--------------------------|-------------------------|
| • Full Stack Web Dev | • Multi-Tenant Architecture | • Event-Driven Systems | • RESTful Web Services |
| • MongoDB ACID Transactions | • Asynchronous Queues (BullMQ) | • Database Systems (SQL) | • Software Testing & QA |

Experience

Process Associate – E-Pub Developer & Data Annotator **Feb 2026 – Present**

Tiruchirappalli, Tamil Nadu

- Developed and validated ePub 2/3 digital publications, maintaining 100% compliance with web standards and metadata accuracy.
- Annotated and QA-reviewed AI/ML training datasets, enhancing data quality and consistency for machine learning workflows.
- Led a team segment in medical billing data operations, consistently meeting productivity targets and workflow compliance.

Mass Mind Institute – Full Stack Developer Intern **Oct 2025 – Dec 2025**

Chennai, Tamil Nadu

- Completed a 7-month Java Full Stack Development training, mastering Core Java, Spring Boot, REST APIs, and SQL database design.
- Developed responsive full-stack modules utilizing React.js for UI rendering and Spring Boot for backend microservices.
- Optimized relational database schemas and implemented JDBC connectivity for high-speed data retrieval.

Projects

NexusForce AI | Node.js, Express, React, Redis, BullMQ, MongoDB, Socket.io, Docker **Feb 2026**

- Architected an enterprise-grade multi-tenant B2B operations engine featuring MongoDB ACID transactions and session locking to prevent inventory race conditions during high-concurrency order spikes.
- Integrated BullMQ with Upstash Redis worker threads to asynchronously process PDF invoices and dispatch email notifications, maintaining API response latencies below 50ms.
- Designed a real-time Socket.io Operations Radar, implemented Redis sliding-window rate limiting for DDoS protection, and deployed via Docker Compose on Render and Vercel.

Blockchain Counterfeit Product Detection System | Java, Spring Boot, Blockchain, SQL **May 2023**

- Developed a decentralized supply chain web solution leveraging Blockchain technology to verify product authenticity for online and offline retail sales.
- Created REST APIs for secure transaction recording and smart contract execution, ensuring complete data immutability and transparency.

AI-Based Natural Disaster Intensity Analysis | Python, AI/ML, React.js **Jan 2023**

- Built a predictive web application analyzing environmental sensor telemetry to classify natural disaster severity using machine learning models.
- Created interactive real-time visual dashboards for environmental risk assessment and reporting.

Technical Skills

Languages: JavaScript (ES6+), Core Java, SQL, Python, PHP, HTML5, CSS3

Frameworks & Libraries: Node.js, Express.js, Spring Boot, React.js, Tailwind CSS, JSP

Databases & Middleware: MongoDB (ACID Transactions), Redis, BullMQ, Socket.io, MySQL, JDBC

Tools & DevOps: Docker, Git, GitHub, VS Code, Swagger (OpenAPI 3.0), Postman, Render, Vercel

Education

Mookambigai College of Engineering **Aug 2019 – May 2023**

Bachelor of Technology – Information Technology – CGPA: 7.09

Pudukkottai, Tamil Nadu

Extracurricular / Certifications

- **Mass Mind Institute:** Java Full Stack Development Certification & Internship
- **IBM:** Artificial Intelligence Professional Certification
- **Academic & Technical Competitions:** Paper Presentation on Blockchain Technology & AICTE Hackathon Winner
